

Year 3 – Stop-frame animation.

Lesson	Brief overview	Learning objectives
1 Can a picture move?	Learners will discuss whether they think a picture can move. They will learn about simple animation techniques and create their own animations in the style of flip books (flick books) using sticky notes.	<ul style="list-style-type: none"> • I can draw a sequence of pictures • I can create an effective flip book—style animation • I can explain how an animation/flip book works
2 Frame by frame	In the previous lesson, learners created their own flip book—style animations. In this lesson, they will develop this knowledge and apply it to make a stop-frame animation using a tablet.	<ul style="list-style-type: none"> • I can predict what an animation will look like • I can explain why little changes are needed for each frame • I can create an effective stop-frame animation
3 What's the story?	Remind the learners of the animations that we created last week and tell them that next week we will use tablets to animate some of our own stories. Tell the learners that during this lesson they will create a storyboard showing the characters, settings and events that they would like to include in their own stop-frame animation next week.	<ul style="list-style-type: none"> • I can break down a story into settings, characters and events • I can describe an animation that is achievable on screen • I can create a storyboard

4 Picture perfect	In the previous lesson, learners planned out their own stop-frame animations in a storyboard. This lesson, they will use tablets to carefully create stop-frame animations, paying attention to consistency.	<ul style="list-style-type: none">• I can use onion skinning to help me make small changes between frames• I can review a sequence of frames to check my work• I can evaluate the quality of my animation
5 Evaluate and make it great!	Last lesson, learners created their own stop-frame animations. This lesson, they will evaluate their animations and try to improve them by creating a brand-new animation based on their feedback.	<ul style="list-style-type: none">• I can explain ways to make my animation better• I can evaluate another learner's animation• I can improve my animation based on feedback
6 Lights, camera, action!	Last lesson, learners perfected their stop-frame animations. This lesson, they will add other media and effects into their animations, such as music and text.	<ul style="list-style-type: none">• I can add other media to my animation• I can explain why I added other media to my animation• I can evaluate my final film
