In the car

- Take turns quizzing each other on times tables. “What’s 7 x 8?”
- Use numbers from license plates to create multiplication problems. For example, if a license plate has "4" and "6," your child can multiply those numbers.

Cooking and Baking

Use recipes to practice multiplication. If a recipe calls for 2 cups of flour and you want to make double, how much flour is needed?

Shopping

Have children help calculate totals while shopping. If an item costs £3 and you’re buying 4, how much will you spend?

Multiplication War

Use a deck of cards. Each player flips two cards, and the first to correctly multiply the two numbers gets the pair. The player with the most cards at the end wins.
